Subject Index of Volume 31

Absorption
  and emission of europium trichloroacetate single crystal at room and low temperatures, 111
Alkoxides and aryloxides
  experimental aspects of metal vapour synthesis of, of lanthanides, 123
Alloys
  evolution of magnetic phase of Pr-rich Pr–Fe alloys in temperature range 300–1000 K, 163
Aluminium
  dispersion and reactivity of molybdena on surface of alumina, 205
  preparation, bulk characterization and surface chemistry of high-surface-area cobalt aluminate, 221
Antiferromagnetism
  in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151

Barium
  antiferromagnetism in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151
  effects of precursor types and their mechanical activation on synthesis temperature of $BaFe_{12}O_{19}$, 273
  polymorphism and magnetic properties of Tm_2BaNiO_5, 145
Beryllium
  growth and characterization of $Be_2Sr_2Ca_1Cu_2O_y$ by floating zone method, 281
Bismuth
  V doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting ceramics, 267
Boron
  luminescence of rare-earth ions in $Ca_3(BO_3)_2$, 333

Cadmium
  photoelectrochemical (PEC) solar cell properties of chemically deposited cadmium selenide thin films with heteropolyacids, 301
Calcium
  growth and characterization of $Be_2Sr_2Ca_1Cu_2O_y$ by floating zone method, 281
  luminescence of rare-earth ions in $Ca_3(BO_3)_2$, 333
  phase equilibria in system $Y_2P_4O_{13}$–$Ca_2P_2O_7$–$Ca(PO_3)_2$–$Y(PO_3)_3$, 257
  thermal conductivity of calcium cerate and calcium zirconate, 347
  V doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting ceramics, 267
Capacitors
  ONO; effects of polysilicon gate on characteristics of, 229
Carbon fibres
  electrophysical properties of ex-rayon and ex-PAN carbon fibres with different temperatures of heat-treatment, 319
Carbonitriding reaction
  of clay; involved phases and mechanism, 325
Carbon-mineral adsorbents
  new type of sorbents?, methods of preparation, 243
Catalysts
  rare earths as, for oxidative coupling of methane to ethylene, 155
Ceramics
  rare earth containing; gel supported precipitation for, 67
  rare earths in ceramic materials technology, 37
  V doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting, 267
Cerium
  evaluation of selectivity on La(III)–Ce(III) separation with chelating extractants, 167
  phase equilibria in partial system $CePO_4$–$Na_4P_2O_7$–$NaPO_3$, 277
  thermal conductivity of calcium cerate and calcium zirconate, 347
China
  rare earth applications and their market in, 85
Clay
  carbonitriding reaction of; involved phases and mechanism, 325
ClO_4^- ions
  do lanthanides form inner sphere complexes with, in competition with H_2O molecules?, 117
Cobalt
  preparation, bulk characterization and surface chemistry of high-surface-area cobalt aluminate, 221
Condensation precursors
  lanthanide(III) complexes with, 93
Copper
  electrical properties of laser evaporated $CuGaSe_2$ thin films, 263
  growth and characterization of $Be_2Sr_2Ca_1Cu_2O_y$ by floating zone method, 281
  V doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting ceramics, 267
Crystal
  absorption and emission of europium trichloroacetate single crystal at room and low temperatures, 111

Dispersion
  and reactivity of molybdena on surface of alumina, 205
Dysprosium
  antiferromagnetism in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151

Electrical properties
  of laser evaporated $CuGaSe_2$ thin films, 263
Electrocatalytic activity
  of Ni–Fe anodes for alkaline water electrolysis, 311
Electroluminescent displays
  full-colour; applications of rare earths in, 7
Electrolysis
  alkaline water; electrocatalytic activity of Ni–Fe anodes for, 311
Electron pseudocharge densities
  in $Zn_xHg_{(1-x)}Te$, 359
Electrophysical properties
  of ex-rayon and ex-PAN carbon fibres with different temperatures of heat-treatment, 319
Emission
  and absorption of europium trichloroacetate single crystal at room and low temperatures, 111
Ethylene
  rare earths as catalysts for oxidative coupling of methane to, 155
European Community R&D programmes
  rare earth materials research in, 29

Europium
absorption and emission of europium trichloroacetate single crystal at room and low temperatures, 111
antiferromagnetism in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151
luminescence of Eu^{3+} doped materials excited by VUV synchroton radiation, 107
luminescence lifetimes of aqueous europium perchlorate, chloride and nitrate solutions, 159

Films
electrical properties of laser evaporated $CuGaSe_2$ thin films, 263
photoelectrochemical (PEC) solar cell properties of chemically deposited cadmium selenide thin films with heteropolyacids, 301
Floating zone method
growth and characterization of $Be_2Sr_2Ca_1Cu_2O_y$ by, 281

Gadolinium
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213
Gallium
determination of galena surface free energy components from contact angle measurements, 235
electrical properties of laser evaporated $CuGaSe_2$ thin films, 263
Gel supported precipitation
for rare earth containing ceramics, 67
Glass technology
rare earths in, 45

Heat-treatment
electrophysical properties of ex-rayon and ex-PAN carbon fibres with different temperatures of, 319
Heteropolyacids
photoelectrochemical (PEC) solar cell properties of chemically deposited cadmium selenide thin films with, 301
Holmium
antiferromagnetism in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151
Hydrothermal treatment
effect of silica gel quantity on course of, in autoclave, 355

Interface
oxide/solution; non-simple coulombic interactions supported by K ions, 351
Ion implantation
synthesis of buried insulating layers in Si by, 285
Iron
effects of precursor types and their mechanical activation on synthesis temperature of $BaFe_{12}O_{19}$, 273
electrocatalytic activity of Ni–Fe anodes for alkaline water electrolysis, 311
evolution of magnetic phase of Pr-rich Pr–Fe alloys in temperature range 300–1000 K, 163
Irradiation
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213

Lanthanum
do lanthanides form inner sphere complexes with ClO_4^- ions in competition with H_2O molecules?, 117
encapsulated lanthanide ions as efficient luminescent species, 13
evaluation of selectivity on La(III)–Ce(III) separation with chelating extractants, 167
experimental aspects of metal vapour synthesis of alkoxides and aryloxides of lanthanides, 123
lanthanide(III) complexes with condensation precursors, 93
lanthanide compounds with particular magnetic properties, 137
Lasers
electrical properties of laser evaporated $CuGaSe_2$ thin films, 263
Nd-doped solid-state, and their applications to materials processing, 57
Lead
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213
Luminescence
applications of rare earths in full-colour EL displays, 7
encapsulated lanthanide ions as efficient luminescent species, 13
of Eu^{3+} doped materials excited by VUV synchroton radiation, 107
lifetimes of aqueous europium perchlorate, chloride and nitrate solutions, 159
of rare-earth ions in $Ca_3(BO)_2$, 333

Magnetic interactions
involving rare earth ions, 17
Magnetic phase
evolution of, of Pr-rich Pr–Fe alloys in temperature range 300–1000 K, 163
Magnetic properties
particular; lanthanide compounds with, 137
and polymorphism of Tm_2BaNiO_5, 145
Manganese
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213
Materials processing
Nd-doped solid-state lasers and their applications to, 57
Mechanical activation
effects of precursor types and their mechanical activation on synthesis temperature of $BaFe_{12}O_{19}$, 273
Mercury
electron pseudocharge densities in $Zn_xHg_{(1-x)}Te$, 359
Metallorganic chemical vapour deposition
new era in optical coating technology, 341
Metal vapour synthesis
experimental aspects of, of alkoxides and aryloxides of lanthanides, 123
Methane
rare earths as catalysts for oxidative coupling of, to ethylene, 155
Mineral
carbon-mineral adsorbents — new type of sorbents?, methods of preparation, 243
Minerals and ores
determination of rare-earth elements in, by inductively coupled plasma-mass spectrometry (ICP-MS), 101
Molybdenum
dispersion and reactivity of molybdena on surface of alumina, 205

Neodymium
antiferromagnetism in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151
-doped solid-state lasers and their applications to materials processing, 57

Nickel
antiferromagnetism in R_2BaNiO_5 oxides (R = Nd, Eu, Dy, Ho), 151
electrocatalytic activity of Ni–Fe anodes for alkaline water electrolysis, 311
polymorphism and magnetic properties of Tm_2BaNiO_5, 145

Optical coating technology
new era in; metallorganic chemical vapour deposition, 341
Oxidative coupling
rare earths as catalysts for, of methane to ethylene, 155

Permanent magnets
rare earth, 15
Phase equilibria
in partial system $CePO_4$–$Na_4P_2O_7$–$NaPO_3$, 277
in system $Y_2P_4O_{13}$–$Ca_2P_2O_7$–$Ca(PO_3)_3$, 257
Phosphor
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213
Photoelectrochemical solar cell
(PEC) properties of chemically deposited cadmium selenide thin films with heteropolyacids, 301
Plasma
analysis and characterization of rare earths by plasma source mass spectrometry, 23
determination of rare-earth elements in minerals and ores by inductively coupled plasma-mass spectrometry (ICP-MS), 101
Polymorphism
and magnetic properties of Tm_2BaNiO_5, 145
Positron annihilation methods
application of, for investigation of structure of modified fine powder silicas, 199
Potassium
oxide/solution interface; non-simple coulombic interactions supported by K^+ ions, 351
Praseodymium
evolution of magnetic phase of Pr-rich Pr–Fe alloys in temperature range 300–1000 K, 163

Rare earth(s)
analysis and characterization of, by plasma source mass spectrometry, 23
applications of, in full-colour EL displays, 7
applications and their market in China, 85
as catalysts for oxidative coupling of methane to ethylene, 155
in ceramic materials technology, 37
compounds; mass spectrometric techniques in study of, 127
containing ceramics; gel supported precipitation for, 67
elements; determination of, in minerals and ores by inductively coupled plasma-mass spectrometry (ICP-MS), 101
in glass technology, 45
industry update, 79
ions; luminescence of, in $Ca_3(BO_3)_2$, 333
ions; magnetic interactions involving, 17
materials research in European Community R&D programmes, 29
permanent magnets, 51
spectroscopy in relation to materials science, 3
Treibacher activities in, 89

Selenium
electrical properties of laser evaporated $CuGaSe_2$ thin films, 263
photoelectrochemical (PEC) solar cell properties of chemically deposited cadmium selenide thin films with heteropolyacids, 301
Silicon
application of positron annihilation methods for investigation of structure of modified fine powder silicas, 199
effect of silica gel quantity on course of hydrothermal treatment in autoclave, 355
effects of polysilicon gate on characteristics of ONO capacitors, 229
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213
synthesis of buried insulating layers in, by ion implantation, 285
Sodium
phase equilibria in partial system $CePO_4$–$Na_4P_2O_7$–$NaPO_3$, 277
Solar cell
photoelectrochemical (PEC), properties of chemically deposited cadmium selenide thin films with heteropolyacids, 301
Sorbents
carbon-mineral adsorbents — new type of sorbents?, methods of preparation, 243
Spectrometry
inductively coupled plasma-mass (ICP-MS); determination of rare-earth elements in minerals and ores by, 101
mass spectrometric techniques in study of rare earth compounds, 127
plasma source mass; analysis and characterization of rare earths by, 23
Spectroscopy
rare earth, in relation to materials science, 3
Strontium
growth and characterization of $Be_2Sr_2Ca_1Cu_2O_y$ by floating zone method, 281
short term depreciation of green-emitting phosphor $Sr_3Gd_2Si_6O_{18}$:Pb,Mn due to 185 nm irradiation, 213
V doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting ceramics, 267
Superconductors
high-T_c: fabricating technologies and future perspectives, 73
V doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting ceramics, 267
Surface
dispersion and reactivity of molybdena on, of alumina, 205
determination of galena surface free energy components from contact angle measurements, 235
preparation, bulk characterization and surface chemistry of high-surface-area cobalt aluminate, 221
Synthesis
of buried insulating layers in Si by ion implantation, 285
metal vapour: experimental aspects of, of alkoxides and aryloxides of lanthanides, 123
temperature; effects of precursor types and their mechanical activation on, of $BaFe_{12}O_{19}$, 273

Tellurium
electron pseudocharge densities in $Zn_xHg_{(1-x)}Te$, 359
Thermal conductivity
of calcium cerate and calcium zirconate, 347
Thulium
polymorphism and magnetic properties of Tm_2BaNiO_5, 145
Treibacher activities
in rare earths, 89

Vanadium
doped $Bi_2Sr_2Ca_2Cu_3O_y$ superconducting ceramics, 267
VUV synchroton radiation
luminescence of Eu^{3+} doped materials excited by, 107

Water
do lanthanides form inner sphere complexes with ClO_4^- ions in competition with H_2O molecules?, 117
electrocatalytic activity of Ni–Fe anodes for alkaline water electrolysis, 311

Yttrium
phase equilibria in system $Y_2P_4O_{13}$–$Ca_2P_2O_7$–$Ca(PO_3)_2$–$Y(PO_3)_3$, 257

Zinc
electron pseudocharge densities in $Zn_xHg_{(1-x)}Te$, 359
Zirconium
thermal conductivity of calcium cerate and calcium zirconate, 347
